These are only some of the foods that are available and known to be good for your dog. If you choose to feed something from your local farm store or pet store...be sure the ingredients do not contain soy as it has been proven harmful to your precious filia.

Some store brands that have worked well areDiamond and Nupro.

Remember...you can feed health to your dog and pay slightly more for the dog food or you can pay your vet....either way....you will pay.
